My final project at

Where to start?
I need Ideas

I want this to be a real world project.

But what does this mean?

My definition of a real world project

It creates some kind of value.

Often it can be measured in numbers/money

Maybe automate a complex task with AI

Which tasks generate value/money, that can be done on a computer?

HOW TO MAKE

MONEY ONLINE

HOW AI can MAKE

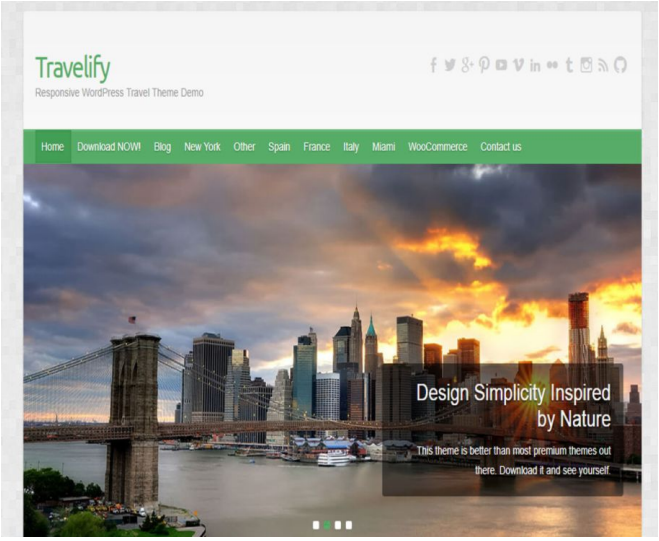
HOW AI can MAKE
MONEY ONLINE
For me

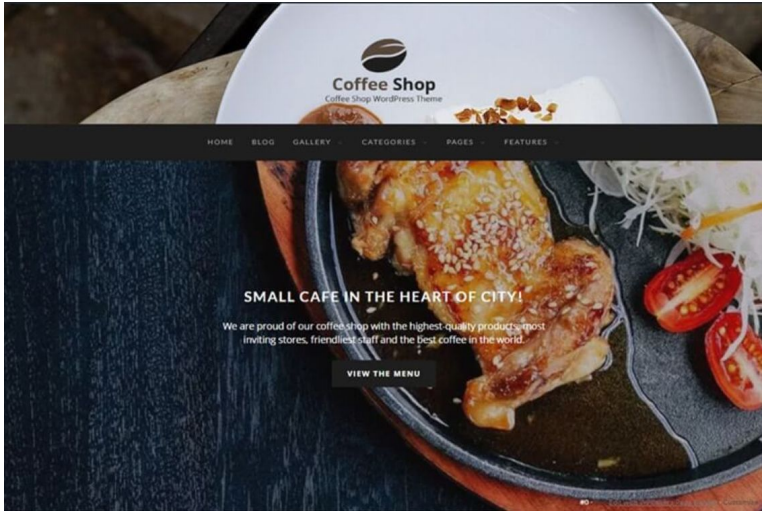
Lots of different ways

I decided to create Blog articles using a DeepLearning Model

NLP (Natural Language Processing) Models are able to solve different tasks.

Blogs in general are dedicated to a certain topic





Get the data

I scraped 2500+ articles from traveling blogs in order to create my corpus

Fine-Tune a pretrained model

I decided to use GPT-Neo. It’s an open source model which has a similar structure to OpenAI’s GPT3. Currently the best NLP model.

Conclusion

Is my model writing actual blog articles?
Does it work?

YES it works!

It’s definitely writing text, that has a writing style, that reminds you of other articles on the internet and is also travel related

BUT

Is it good/what I wanted?

NO
it’s really bad!

As for now I don’t have any control what it’s writing about. And the text itself doesn’t seem to have an actual intention or a structure

Next steps/How to improve?

During my research I found a company, that does give you text generating software to write marketing texts.
